December 8, 2016

Dear Parents/Guardians and Community Members:

As you know, we are continuing to move forward with lead testing at Sandy Creek Central School District. We were required to test our Middle/High School by October 31, 2016, and we completed the testing on September 28, 2016. The New York State legislation requires all water sources to be under 15 parts per billion (ppb). We tested 75 outlets and four (4) outlets came back above the 15 ppb threshold. Those are: (2) Technology room sinks, (1) HS Girls Lavatory sink on second floor, (1) kitchen steamer. All of these locations were under the 20 ppb EPA threshold. We have taken measures to remediate all of these locations and have placed them temporarily out of use until they are retested and return satisfactory results.

Please feel free to refer to our website at www.sccs.cnyric.org, as we will post all results of the lead testing at Sandy Creek Central School District. Do not hesitate to contact me if you have any questions or concerns.

Sincerely,

Kyle L. Faulkner

Superintendent of Schools
